

Project Description

The Legacy Way Tunnel, formerly known as the Northern Link Tunnel, is a major infrastructure project located in Brisbane, Queensland, Australia.

It serves as a key arterial link, significantly reducing travel time between the western suburbs and the inner city.

The tunnel connects the Western Freeway at Toowong with the Inner City Bypass at Kelvin Grove, spanning approximately 4.6 kilometres.

Clients

Transcity Joint Venture
(BMD, Ghella, Acciona)

JAGCON Group Role

JAGCON Group worked with the BMD Ghella Acciona Joint Venture providing digital engineering support throughout the lifecycle of the project.

Project Delivery Roles:

– Tunnelling Structural/Civil Designer

Project Services:

– Digital Engineering

Project Value

\$1.5 Billion

Sector

Tunnelling, Roads, Transport, Infrastructure, Major Civil Works, Major Projects
