

Tunnel, Stations & Development (TSD)

PROJECTS

Project Description

The TSD project is the underground and brownfield rail surface works associated with the design and construction of the new Cross River Rail. The 10.2km railway includes 5.9km of twin tunnels running beneath the Brisbane River and CBD with four new underground stations at Boggo Road, Wolloongabba, Albert Street and Roma Street.

The project also provides a new above ground station at Exhibition, a rebuild for seven stations between Dutton Park and Salisbury, construction of three new stations on the Gold Coast, delivery of two new stabling and maintenance facilities, and commissioning of a new world class signalling system.

JAGCON Group Role

JAGCON Group worked with the CPB Contractors, BAM, Ghella, UGL Joint Venture (CBGUJV) providing project management services, expert advice on constructability & senior engineers throughout the lifecycle of the project.

Project Services:

- SME Reviews
- Strategic Advice
- Planning & Constructability

Project Delivery Roles:

- Senior Project Engineer
- Project Engineers
- Site Engineer

Clients

CPB Contractors, BAM, Ghella, UGL Joint Venture

Project Value

\$7.7 Billion

Sector

Tunnelling, Transport, **Rail**, Infrastructure, Major Projects, Major **Civil Works**
