

### Project Description

Transport for NSW's M6 Stage 1 project features twin 4km tunnels linking the M8 Motorway at Arncliffe to President Avenue at Kogarah.

The works involve complex roadheader tunnelling through varying geology, the construction of a dive portal structure, and upgrades and tie-ins to existing road infrastructure.

### Clients

CPB Contractors, Ghella and UGL joint venture

### JAGCON Group Role

JAGCON Group worked with the CPB Contractors, Ghella and UGL joint venture (CGU) providing project management services, constructability advice & senior engineers throughout the lifecycle of the project.

#### Project Delivery Roles:
