

Sydney, NSW

PROJECTS

Project Description

The Western Harbour Tunnel will be the crucial second road crossing underneath Sydney Harbour, providing a western bypass of the CBD with twin three-lane tunnels to ease pressure on the Sydney road network.

Stage 2 includes tunnelling from the WestConnex Rozelle Interchange at Birchgrove to the Warringah Freeway at Cammeray. Tunnelling will utilise TBMs, with twin 1.5km drives under Sydney Harbour. The Stage 2 scope also includes roadheader tunnelling and full fit-out of the tunnels.

Client

Acciona

JAGCON Group Role

JAGCON Group worked with Acciona providing specialist ventilation services.

Project Services
– Ventilation

Project Value

\$4.2 Billion
